

Spectrum Ownership Analysis

Geared heavily towards strategy, presentation and curiosity, this portion of SiteSync allows users the ability to query the complete spectrum story. View competitors, your own spectrum or potential targets. Learn the technology deployed, the carrier or owner of Cellular and/or PCS frequencies, or even compare two as if they merged. Query AWS, BRS, Cellular, WCS, EBS, 700Mhz and others for spectrum mapping and research. Combine this with 3rd party Marketed Coverage containing hundreds of carriers, add demographic information, display the highway traffic counts then print for the meeting!

Our Spectrum access is part of the
The SiteSync Platform™

Available with the SiteSync Power Package.

(Not included in this package: Marketed Coverage. Call for pricing.)
