FAA Filings – FAA Mapper Deluxe Package

\$390.00 ea

The Wireless Applications professional staff analyzes your site and provides a risk assessment for the potential of airspace hazard, height restrictions, or lighting and painting requirements in the form of an Opinion Letter. This service includes additional marketing site evaluation and online document storage.

Details:

o **Full FAA airspace analysis relative to the structure**

For each study, an in-depth airspace study for potential hazard is performed to gather risk factors regarding potential structure height and the resulting filing risks. Our team generates and attaches all the required maps and analysis which can include the topographical, aerial, aeronautical, IFR, NAD Conversions, Glide Slope, AM Station, etc. Your initiation of the this service is done through our web entry page and upon your service request, our automated system immediately e-mails a simple text, single page summary of your site with NAD and English/Metric conversions.

o **Opinion Letter**

Once our analysis is complete, we summarize the findings and compose a detailed Opinion Letter. This letter identifies FAA filing recommendation, potential airspace hazard, height restrictions, and lighting and painting requirements.

o **Filing of site with the FAA**

Included with this service, you may choose to have Wireless Applications file your site to be studied by the FAA. (if you plan to file with the FCC, filing with the FAA is required.)

- o Complete and submit the FAA filing form 7460-1, Notice of Proposed Construction or Alteration (if requested)
- o Complete and submit the FAA filing form 7460-2, Notice of Actual Construction or Alteration (parts I and II) (if requested)

Site Specific Information Reports

This package of reports provides you with a detailed analysis of your site across multiple facets. Use this package of reports for your own market analysis as well as highlighting your site's unique qualities to maximize the lease-up potential. For more detail on SSIRs: <http://www.wirelessapplications.com/Products/SSIR/>.

- o Included in Site Specific Information Reports
 - .5, 1, 3, 5 mile Search Ring of existing towers, with Hwy Traffic
 - Census Growth and Density Statistics for that ring
 - Business Density Analysis
 - Spectrum Ownership Analysis
 - RF Propagation Study

o **Tracking**

Wireless Applications allows you to track update the progress of your FAA filing all in our on-line database. Each site you have Wireless Applications will be available for you to track from your custom SiteSync account.

o **Interactive mapping**

Once you sign up for the first analysis package, you are provided a secure login account to the on-line software platform, SiteSync.

Telecom Engineering

The Site Sync Platform

The SiteSync FAA Mapper package allows you to request regulatory analysis and filing services on-line as well as it allows you to access to interactive mapping and tracking of all your sites analyzed and filed by Wireless Applications.

o Virtual Vault of all documentation per each site Go Green!

Upon completion, all documents are uploaded to a secure virtual vault. This means that we provide you web link with PDF files of your Opinion letter, the FAA forms (7460-1 and 7460-2) the resulting FAA determination and all the supporting maps and analysis documentation and our SSIR reports. You may also upload your supporting documentation to this location, such as surveys, EA reports, pictures and other forms. Documents from the FAA are also logged into this database. The web link that gets sent back to you contains a professional site detail with your logo, a note section, graphic layout of structure points and all associated PDF files for that particular filing. This site is supported indefinitely, meaning you have a secure online location for your site that you can share with your team via the site link provided to you upon completion of the analysis. By sending you this link, it keeps electronic mail to a very low file size and allows clients to forward link details to whomever they feel appropriate. This link is specific for that site, whereas your unique FAA Mapper log-in to SiteSync contains ALL sites filed and should not be given out.

A sample FAA Company and filings can be seen at www.wirelessapplications.com/faa

Username: CROFT **Password:** CROFT (Although the sites are fictitious, all have full analysis performed)

Additional Charges:

Note that after Wireless applications has completed the analysis and the link has been forwarded, should your Lats and Longs or heights change, there will be an additional \$390 charge to redo the analysis. This is most common when clients identify a location via GPS or other means, but later a formal survey is performed showing another set of coordinates and/or heights. Because of the many pieces to the analysis and filings there is a requirement to complete a full re-evaluate the entire location.

Additional Regulatory A La Carte services:

- o Form 7460-2 part I and II** **\$80.00 ea**
Filing, creating PDF on site link and tracking

- o FAA Search Rings**– (up to a maximum of 6 locations per ring) can be generated within a ½, a 1, or a 3-mile radius. Within each search ring, the locations are placed by an RF engineer, making the final sites generally ones that are obtainable with site acquisition . In addition each site has a complete airspace impact performed and then written in summary in a simple two to three page report. Three search rings are available:
 - ½ mile FAA Search Ring **\$375.00 ea**
 - 1 mile FAA Search Ring **\$625.00 ea**
 - 2 mile FAA Search Ring **\$875.00 ea**
 - 3 mile FAA Search Ring **\$1500.00 ea**

- o DOT notification filing** **\$80.00 ea**
Submission and Tracking of site

- o FCC Registration and Filings**
We provide complete FCC registration and filing services and support. This includes researching, processing and overseeing the entire filing process.

- o FCC Reg. Form 854** **\$80.00 ea**
Antenna Structure filing, creating PDF on site link

o FCC Reg. Misc submissions

\$80.00 ea

(Ownership change, Modification, Cancellation, Dismantlement, Duplicate, Withdrawal)

o Custom regulatory analysis or services

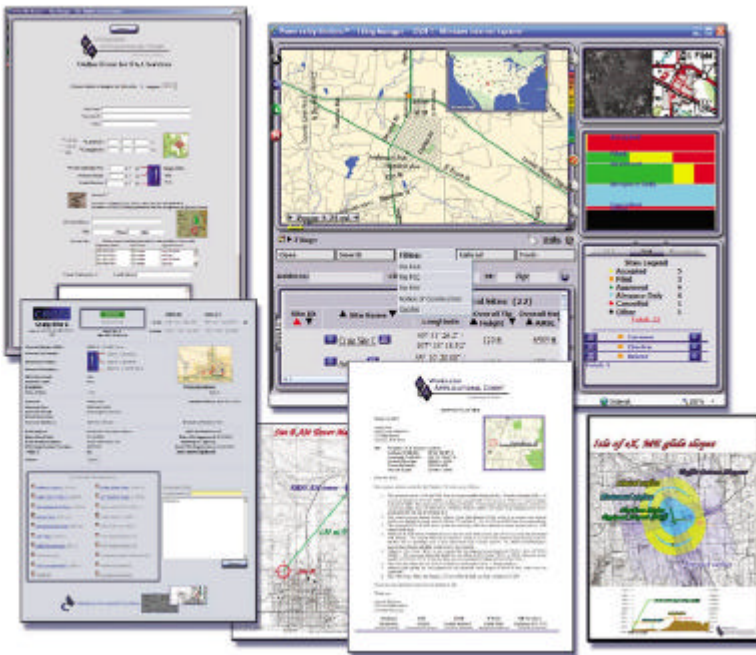

\$147.00/hr

Other services are billed hourly such as researching and/or correcting previous records. PCS and Cellular FCC filings outside the above services are billed on an individual basis and can be quoted individually by projects. *Note: Application and filing fees charged by the FCC are an additional cost and are billed directly to the client by the FCC.*

GIS (Geographic Information Systems) Mapping

\$147.00/hr

We provide advanced data processing and geo-coding, enhancing your spreadsheet and databases with a wide knowledge base of importing, converting and formatting into various mapping environments. Whether it be web-based, tabular, mapped or all three, a wide array of spatial analysis can be performed on your data allowing for full analysis capabilities for real time company strategic business planning processes. We offer a wide assortment of geographic data for the U.S. and World to help with business analysis and presentations. With access to a multitude of data resources we provide powerful data analysis evaluations needed for your specific tasks. Existing data files include: US Census/Demographic 1990 and 2000, multiple County terrain data, terrain models, Traffic Counts, wireless co-location sites, streets, central offices, market ownership, spectrum auction bid results, etc. Outputs from our GIS professionals provide powerful high resolution maps up to 1440 dpi and in sizes up to 44 x 120 inches that display your data in a highly visual format for maximum presentational and financial investment value.

As part of our FAA service, you may enter your FAA filing requests on-line through our login tool located on our web site at www.wirelessapplications.com. To access our online entry section, first-time users will need to have a new

account for access. You will also be able to track your FAA filings geographically online with our FAA Mapper showing progress and timelines for each. For more details please call.

Note: All taxable items are billed FOB Seattle.
